Report of Multiplier Event 6: “Relearn Plastics” Learning materials presentation

Hosting partner: Private Grammar school ‘E-gimnazija’, Radnička 20, 21000 Novi Sad, Serbia

Location: Private Traffic school, Radnička 20, the second floor, 21000 Novi Sad, Serbia

Start date: 28th November 2022

End date: 28th November 2022

On 28th November 2022, Multiplier Event 6 ‘ReLearn Plastics’ Learning materials presentation was held in Novi Sad. It was held in a Private Traffic school in Radnička 20, Novi Sad. My colleague Nela and I were working on this project and I was presenting this presentation to the audience.

There were 22 participants from other schools, from some primary, secondary as well as grammar schools in Novi Sad and nearby. Most of them were from a primary school ‘Svetozar Marković Toza’ in Novi Sad. After two hours of the presentation, all guests agreed that it was such an interesting presentation, which could be applicable and used in all spheres of life, as well as in education. There will be modelled a work of art from the history of art that the pupils will do in 3D in a computer program designed for 3D modelling. The participants concluded that the creation of a replica of the work of art will be very amusing and thrilling both for pupils as well as for everybody who see that and get in touch with that. The 3D printer will print a replica of the selected artwork using the filling we got from collecting PET packaging. There it could be seen how a work of art was formed from the waste.

It also raised the awareness of harmful effects of plastic and how it should be used in the best possible way.
