- Associació Cultural CRESOL - Art i Creativitat per un desenvolupament social, sostenible i solidari Spain
- Youth Club of municipality of Stara Pazova Serbia
- E gimnazija Serbia
- Biotehniški center Naklo Slovenia
- Faculty of Organizational Sciences University of Maribor Slovenia

Plastic is one of the biggest problems that the world faces today, although forty years ago it was presented as a revolutionary idea much cheaper than all others we had at that time.

PROJECT'S OBJECTIVES

The objective of Erasmus+ ReLearn Plastics is the improvement of key competencies for students by means of art, creativity, and new learning methodologies with the purpose of strengthening awareness and active citizenship about plastics consumption.

To achieve this general goal, the following specific goals have been defined:

- Supporting opportunities for students in acquiring and developing key competencies, including basic skills through art-based learning and Service Learning Methodology.
- Strengthening the profile of the teaching professions, developing innovative methodologies to increase the awareness and action in students about plastics.

MAIN STAGES AND ACTIVITIES

ReLearn Plastics' implementation follows this structure:

- 1) Beginning
- 2) School staff training
- 3) School student training
- 4) Closure
- 5) Project Management (transversal)
- 6) Dissemination (transversal) –Website, social networks, meetings, mainly addressed school students and teachers, and professionals.

It is expected that ReLearn Plastics implementation contributes at:

- *Strengthen the school teachers' competences regarding plastic challenges, art and innovative educational methodologies.*
- *Facilitating new opportunities for school students based on high-quality and innovative learning and international experience.*
- *Improving key competences in school students.*

The IOs produced by ReLearn Project are:

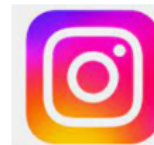

- IO1- Learning Material: Plastics in Europe.*
- IO2- Learning Guide: "Plastic Awareness through Art-methodologies"*
- IO3 – Service Learning Methodology: "Active citizen for plastics reduction".*
- IO4 – Guide and practical tools. Implementation "Plastic Awareness" in classroom.*
- IO5 – Guide: Best practices of implementation Service-Learning for Active Citizens plastic challenges.*
